A New Breed of People Movers: E-450 TramstarHD

Wichita, Kan. — Chance Morgan's TramstarLFT has taken on a new form in the upgraded E-450 TramstarHD. The heavy duty version of the Tramstar includes a V-10 engine and can be converted to run on compressed natural gas and propane.

Specialty Vehicles, Henderson, Nev., is the exclusive distributor for the Tramstar product line. Specialty Vehicles sales manager, Leah Munoz says, "The E-450 increases the overall capability of the tram. Passenger capacity now reaches up to 132 and we can pull 4-trailers on flat ground! That is a pretty significant accomplishment of a high end, Altoona tested tram!"

Another major benefit the E-450 provides over the original Tramstar is its ability to climb steeper grades pulling one or two trailing units. "This is an important feature for many of our current and potential users," said Munoz.

San Diego Wild Animal Park, Escondido, Calif., signed a contract, June 1, for five complete units, including one power unit and three trailing units each. This order is set to be delivered in early 2007.
