Rides Refurbished:

- Carousels
- Century Wheel
- Giant Wheel
- Pharaoh's Fury
- Yo-Yo
- Zipper

HOW IT WORKS

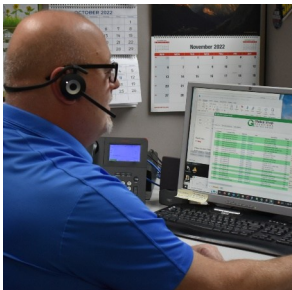

When we refurbish your ride, we start by stripping it down to the bare steel and refurbishing it from the ground up giving your ride a fresh, brand-new appearance.

1 Inspection

A ride inspection is required for an initial fee, which will be credited toward the total cost if a full refurbishment is completed.

2 Scope of Work & Estimate

After the inspection, we'll evaluate your ride and identify the necessary services. We will provide a list of required items plus any optional opportunities. Once the scope of work is defined, we'll provide an estimate.

3 Ride Disassembly

We'll arrange for your ride to be shipped to the factory, where our team will dismantle it for refurbishment. During disassembly, we may identify additional needed repairs. Any changes to the scope of work will be discussed with you before proceeding with additional repairs.

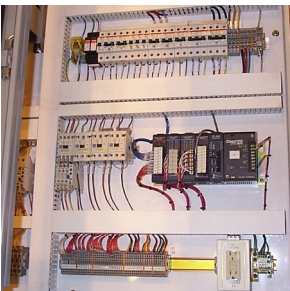

4 Primed and Repainted

Steel parts undergo media blasting, inspection and non-destructive testing prior to priming and repainting at our advanced paint facility. It is painted using the highest quality single stage urethane system or automotive paint system based on need.

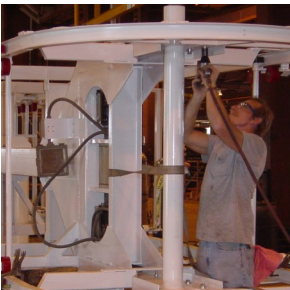

5 Fiberglass and Plastic Parts

Fiberglass and plastic parts are repaired or replaced, then repainted for a sleek, refreshed finish.

6 Control Systems, Wiring & Lighting

Control systems are thoroughly inspected, repaired and upgraded to meet industry standards. Where applicable, we install new wiring, lighting and optional custom LED theming per customer request.

7 Final Assembly, Testing and Ride Delivery

Refurbished components are reassembled, tested and shipped back to you, with your ride ready for customers to enjoy!
